WHERE HISTORY AND THE HORIZON MEET.

Just a short way off the beaten path you'll find a National Park without wait lines. Take a gander, take a deep breath, take in the Badlands and relax. The terrain of the Badlands is hard to describe and like most natural wonders, a photo just doesn't do it justice. You have to see it with your own eyes and feel the greatness of a place that's still wild. Featuring 70,448 acres and 136 miles of hiking trails, its unspoiled nature inspired Roosevelt to become America's "Conservation President."

Buck Hill, South Unit

SOUTH UNIT

The south unit is the most visited with a 44-mile out and back scenic drive interspersed with sweeping views of the rough terrain of the Badlands and the Little Missouri River carving its way through the landscape. The wildlife here is still wild and includes bison, elk, prairie dogs and wild horses. Two Visitor Centers can help you get acquainted with the park and the hiking trails. Painted Canyon Visitor Center is right on

Interstate 94 just outside Medora to the east. You can get your first glimpse of the Badlands at an overview and even take a short hike down into it. The South Unit Visitor Center is located in Medora, right at the entrance to Theodore Roosevelt National Park. Theodore Roosevelt's Maltese Cross Cabin is open to walk through during visitor center hours.

COMING SUMMER 2026

THEODORE ROOSEVELT PRESIDENTIAL LIBRARY

The new Presidential Library will inspire visitors to learn from his enduring legacy and pillar principles of conservation, leadership and citizenship. With a design that becomes part of the surrounding Badlands, the Library will be one of the most sustainable cultural institutions in the world. A legacy worthy of our conservation President.

NORTH UNIT

The north unit is just 50 miles from Interstate 94 near Watford City. It's even further off the beaten path than the south unit and you'll be rewarded with the ruggedness and solitude of this less-visited area of the park. The 14-mile (28-mile roundtrip) scenic drive takes you to the iconic view of the River Bend Overlook about midway through the drive and then onto the equally breathtaking panorama at Oxbow Overlook at the end. Watch for bison and bighorn sheep.

ELKHORN RANCH UNIT

After his wife and mother died on the same day, Theodore Roosevelt left New York to heal. He went back to the Badlands where he built a house and ranching operation in this secluded area of the Badlands. The cabin is gone, but the foundation stones remain. Visitors can stand in the place where Roosevelt escaped to solitude and nature's peace over 100 years ago.

FOLLOW THE PATH OF A PRESIDENT

Walk the trails of Roosevelt's legacy

Hello, elbow room! The Park's most popular hikes are well traveled, but you won't be literally bumping into other travelers as you try to enjoy the fresh air and stunning views. So, show up whenever you want, step onto the trail and exhale a breath of relief. You can hike or horseback ride on the non-mechanized trails in the park. Mountain bikers will find amazing single track trails outside the park through the million acre Little Missouri National Grasslands, including the Maah Daah Hey Trail, a 144-mile single track trail through the Badlands.

WHERE TO LOOK

It's simple and fun to find your favorite (and new) species of birds in North Dakota. Look for birding drives and trails, wildlife refuges and nature areas throughout the state. During spring migration, you could see up to 25 species of warblers just in the Turtle Mountains near Bottineau.

Steele Birding Drives take you through an area named one of the Top 10 Birding Hotspots in North America. Birding Drives Dakota showcases birding near Carrington and Jamestown, including Arrowwood National Wildlife Refuge which features more than 16,000 acres of premier birding habitat.

Near Drake and Anamoose, along the Souris and Sheyenne rivers, find more than 300 species at birding sites like Lonetree Wildlife Management Area and Wintering River National Wildlife Refuge. Head east to the Devils Lake area to visit White Horse Hill National Game Preserve or Lake Alice National Wildlife Refuge — often called the everglades of the prairies.

TRACE THE PATH OF DISCOVERY

WELCOME, EXPLORERS!

Come see where the Lewis and Clark expedition, also known as the Corps of Discovery, spent more time than any other place on their journey. This was an adventure that shaped the nation, and their winter camp location was chosen for its friendly, hospitable reputation. Follow the Lewis and Clark Trail today and enjoy the same hospitality.

Fort Mandan State Historic Site, Washburn

NORTH DAKOTA IS RICH WITH THE LEGACY OF LEWIS AND CLARK

The explorers documented adventures along the Missouri River that visitors can still see today. Here they saw grizzly bears, giant cottonwood trees and the Knife River Indian Villages with a population larger than St. Louis. Though it has changed, this is still the same mighty river that drains a watershed of more than a half-million square miles from 10 states and 2 Canadian provinces.

While here, the Corps of Discovery met Native American tribes including Mandan, Hidatsa and Arikara. Follow the trail to On-A-Slant Indian Village near Mandan where you can explore six reconstructed earthlodges. Then visit Knife River Indian Villages National Historic Site near Stanton to learn more about the people living here when they arrived.

Fort Union Trading Post National Historic Site, near Williston

Visit the Lewis and Clark Interpretive Center in Washburn to learn the story of the expedition and its time with the Mandan and Hidatsa tribes. This is the reconstructed base where Lewis and Clark spent the winter of 1804–1805. Here, they met Sakakawea, the Native American

woman who would join their journey. West of Williston, the Missouri-Yellowstone Confluence Interpretive Center marks the confluence of these two mighty rivers and highlights the fur trade era and the Corps of Discovery. See the same views the Lewis and Clark Expedition enjoyed and visit Fort Union Trading Post National Historic Site.
