Attracting workers to North Dakota is essential in helping to meet the state's current and future workforce needs. Internships provide a valuable way for students to make connections with businesses and identify career options in North Dakota. Operation Intern is designed to expand the number of internships, work experience and apprenticeship positions with North Dakota employers.

The program's primary focus is employers in the state's targeted industries: energy, advanced manufacturing, value-added agriculture, tourism and technology-based businesses, and autonomous systems. Funding may also be granted for other in-demand occupations on the Workforce Development Council's In-Demand Occupations Annual List. Government entities and non-profit organizations do not qualify for the program. Non-profit organizations in tourism and healthcare may be considered on a case-by-case basis, pending eligibility on the in-demand occupations list.

North Dakota businesses receive up to \$5,000 in matching funds for the internships. Funding can be used for items needed for the intern to perform their internships, like wages, tools and equipment, essential training or tuition reimbursement. The funding is a one-to-one match.

The Workforce Development Division of the North Dakota Department of Commerce manages Operation Intern.

Updated 01.10.2025

“Interns are an important part of OmniByte history and future. I have been utilizing the Operation Intern program nearly since its inception. I have been a big supporter of having a solid internship program where we provide real-world work for students while realizing value-added output from them.

President and CEO Ray Berry of OmniByte Technology

This apprenticeship program is important as this is a growing and important field with a limited number of graduates. It allows us to select solid employees and offer them the opportunity to develop new skills and earn higher wages.”

Human Resources Manager Vicki Ham with Marvin Windows
