

**We're
Counting
On You!**

NORTH
Dakota
Be Legendary.™

If you spend at least 51% of your time in North Dakota, you need to be counted in the ND census. Federal funding goes towards resources we need, such as healthcare, infrastructure and education.

**Census
2020**

Everyone counts on the census and answers are completely confidential.

Being counted in the census helps future generations.

Every person counts in North Dakota – even if you spend winters elsewhere. If you are a resident six months and one day, you count.

A complete count helps direct federal funding back to our great state. Every dollar goes a long way, and these dollars add up. In North Dakota, federal funding goes towards programs like \$117 million for Medicare, \$437 million for Medicaid, \$65 million for rural electric loans and loan guarantees. And much more!

This year's census affects our state for the next decade. It's critical that everyone is counted and we're counting on you!

Taking the census is fast, easy and confidential!

It can be done online, by phone or by mail in less than 10 minutes, and help is available for those that need assistance.
